

Carboxylic Acid Biosynthesis

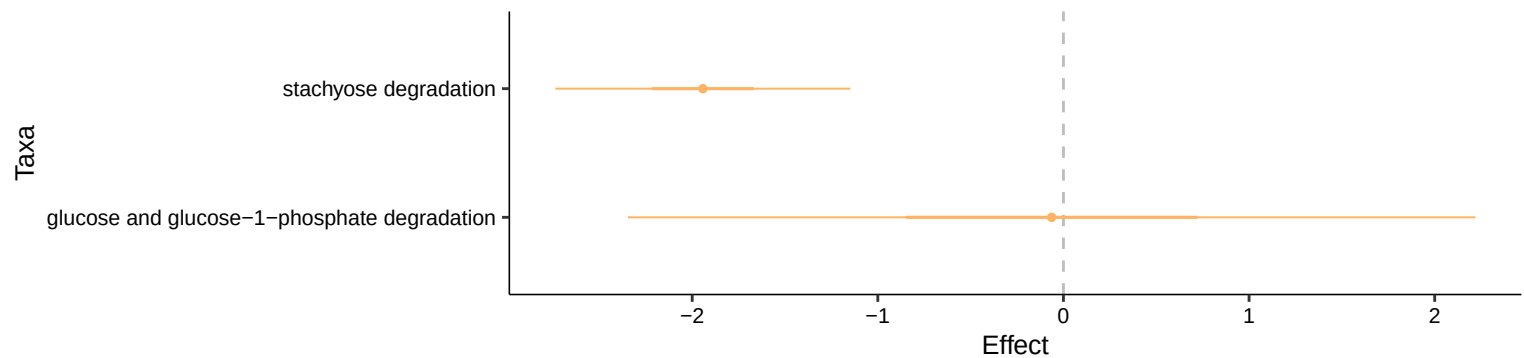

Amino Acid Degradation

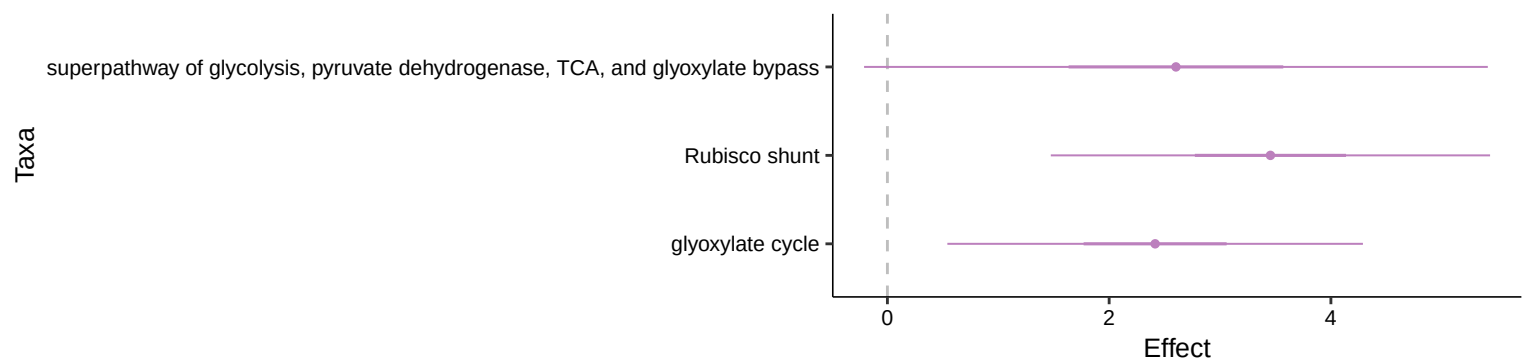

Carbohydrate Biosynthesis

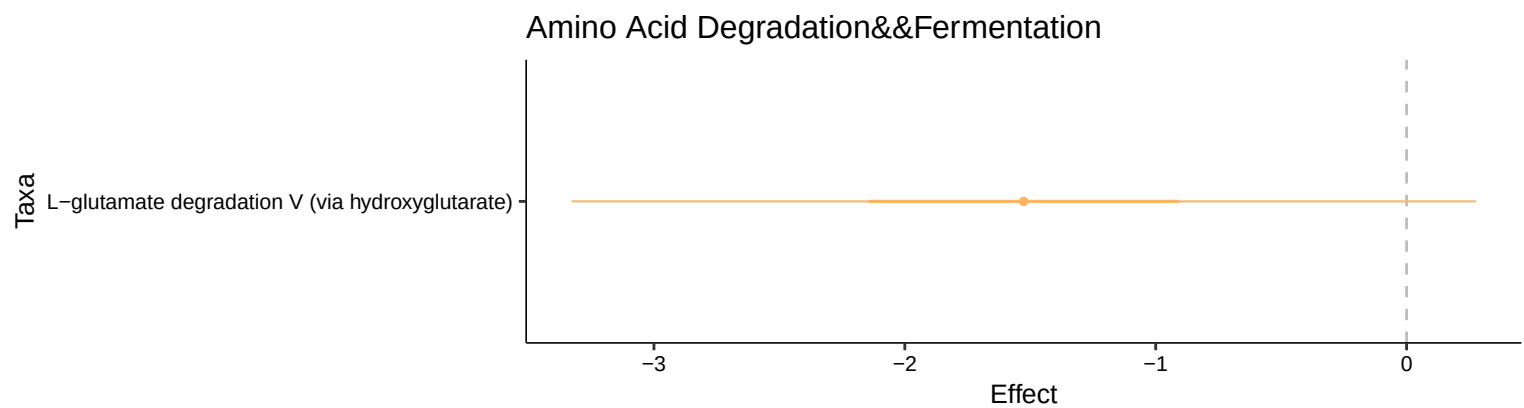

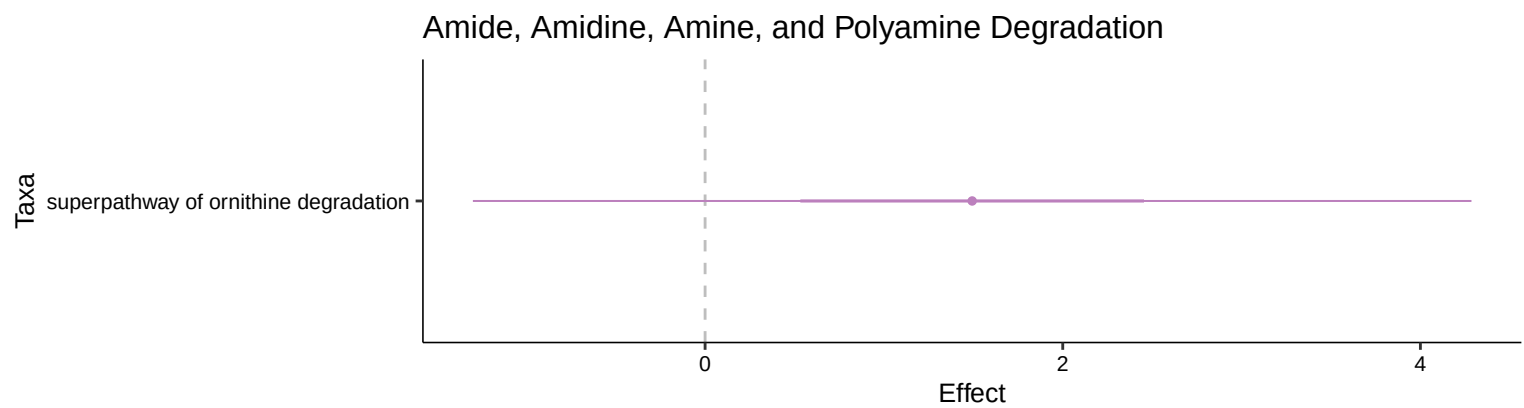

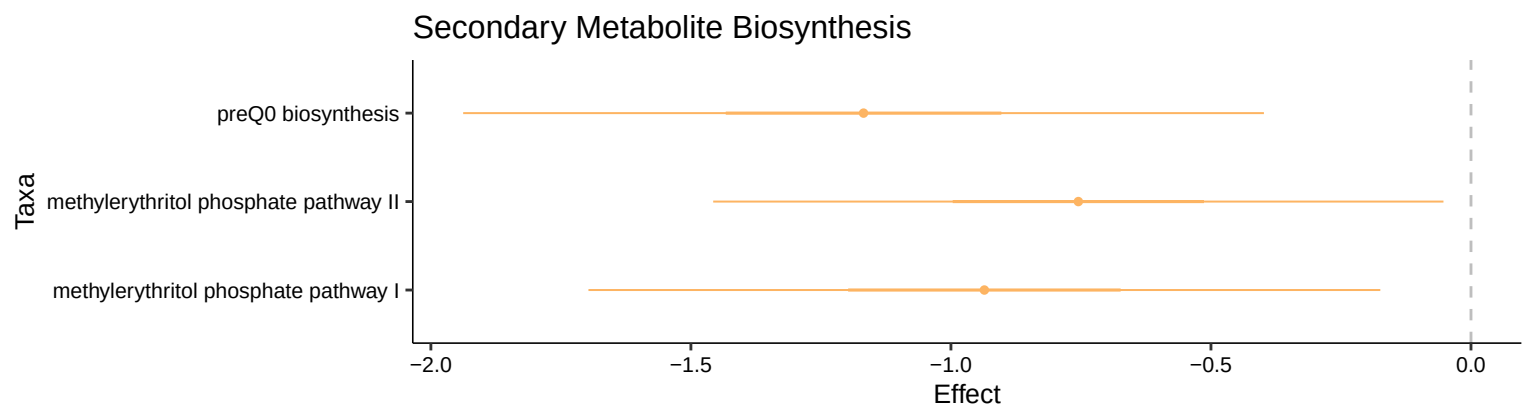

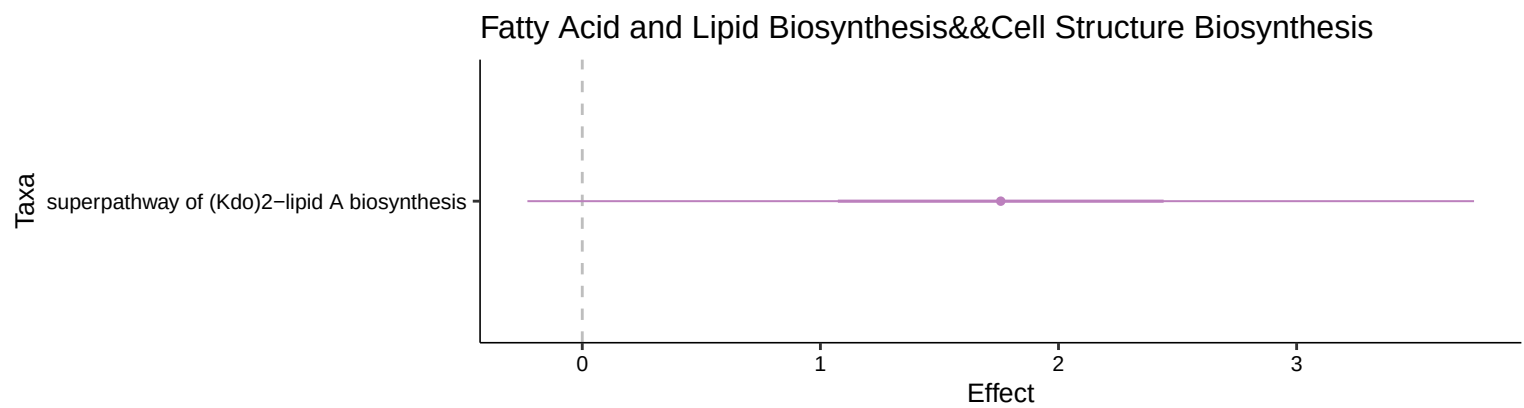

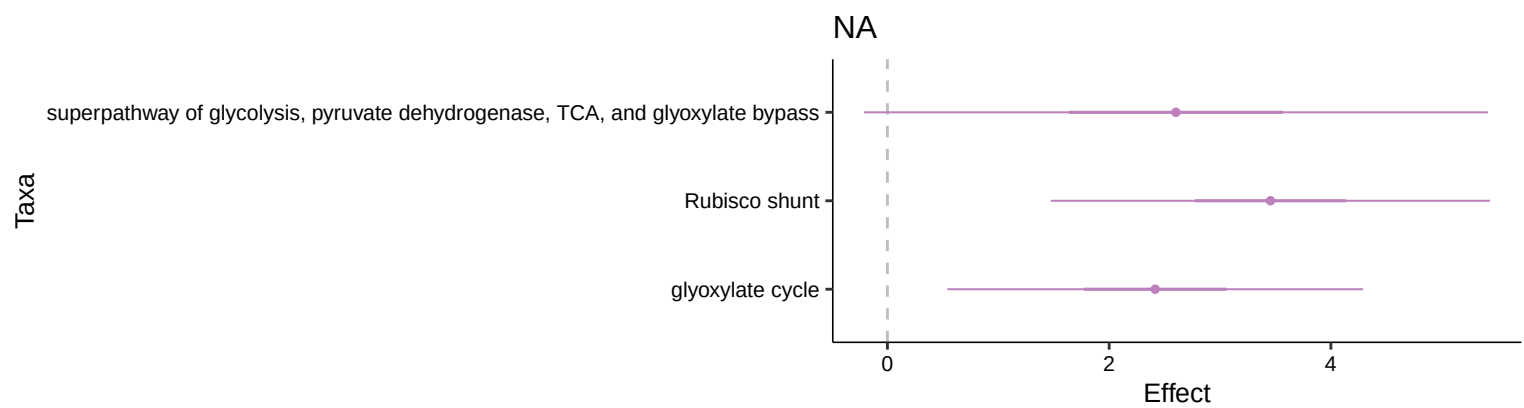

Carbohydrate Degradation

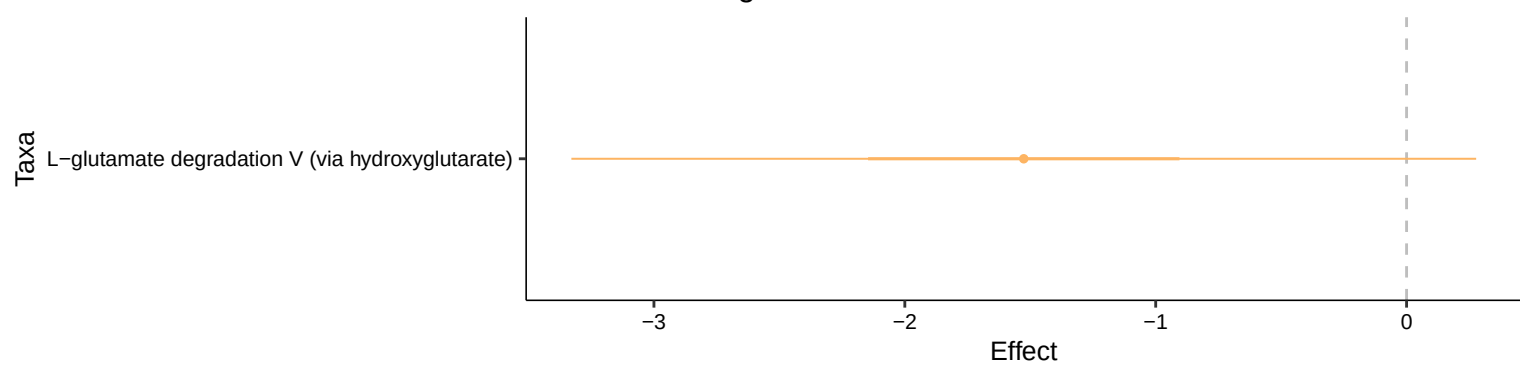

NA

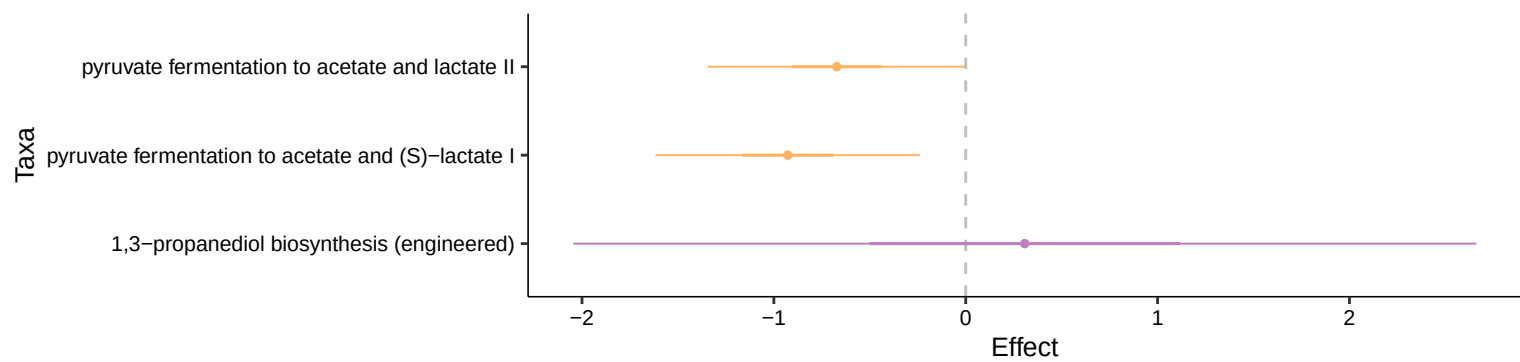

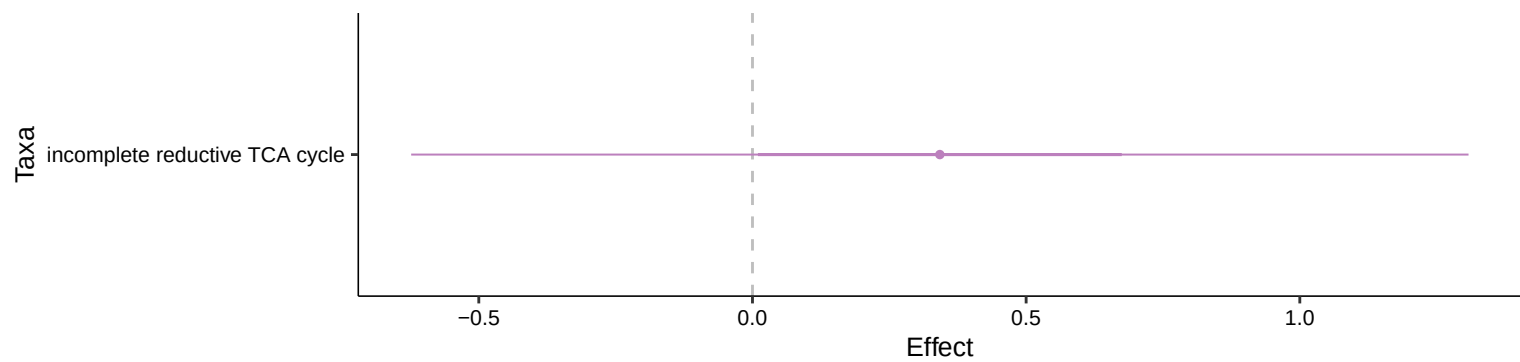

Amino Acid Degradation&&Fermentation

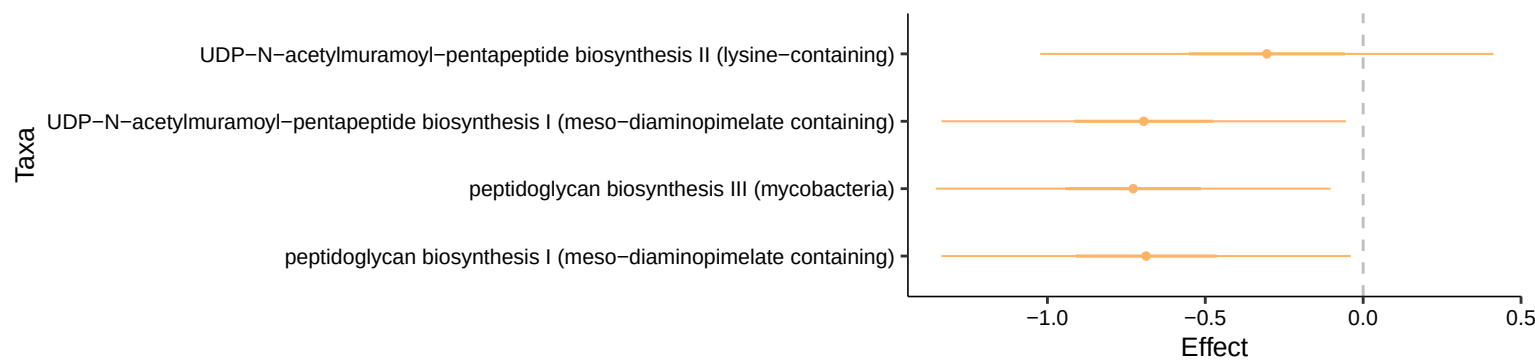

Fermentation

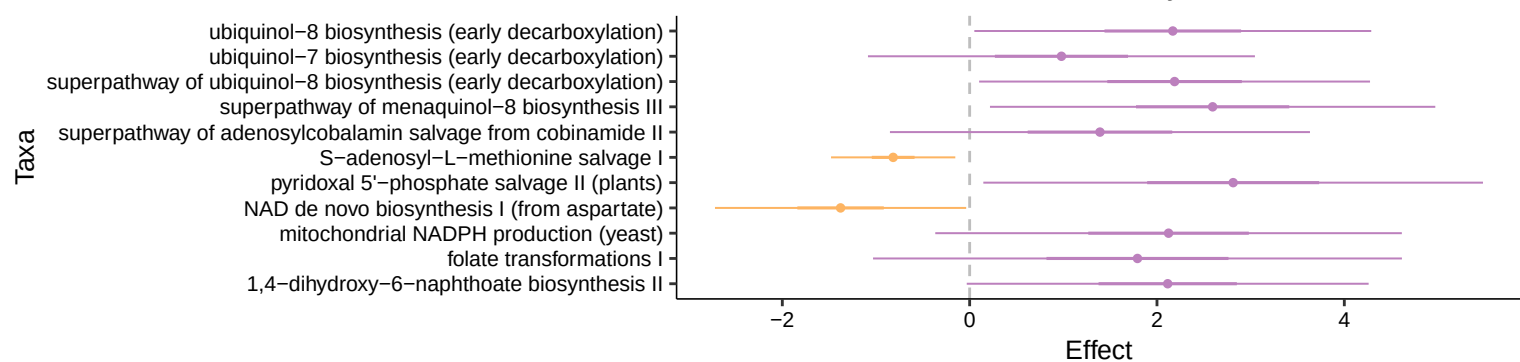

C1 Compound Utilization and Assimilation

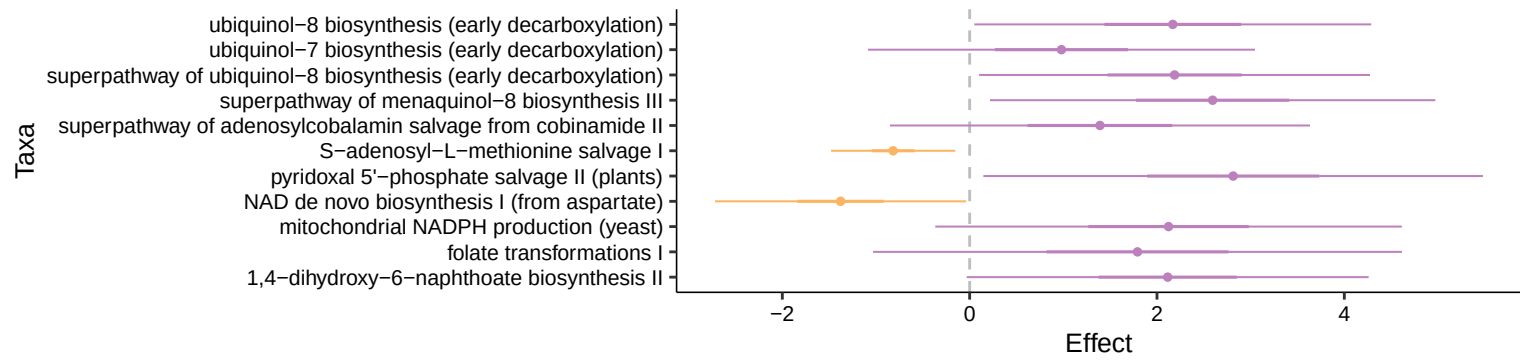

Cell Structure Biosynthesis

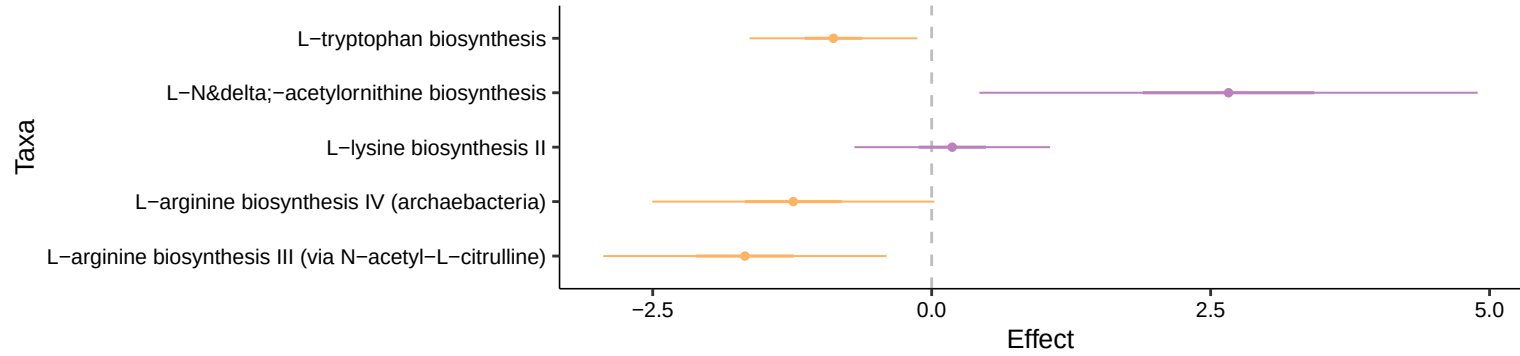

Cofactor, Carrier, and Vitamin Biosynthesis

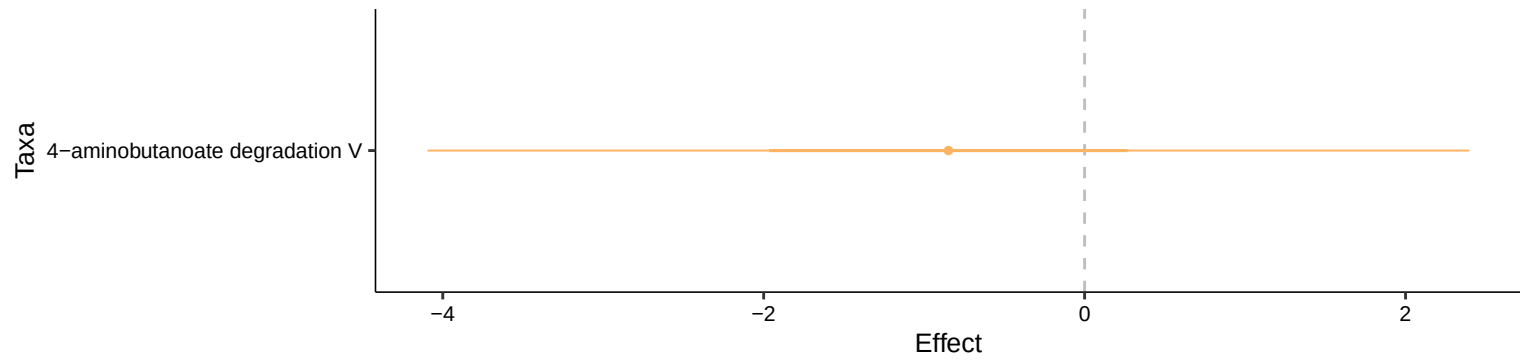

Cofactor, Carrier, and Vitamin Biosynthesis

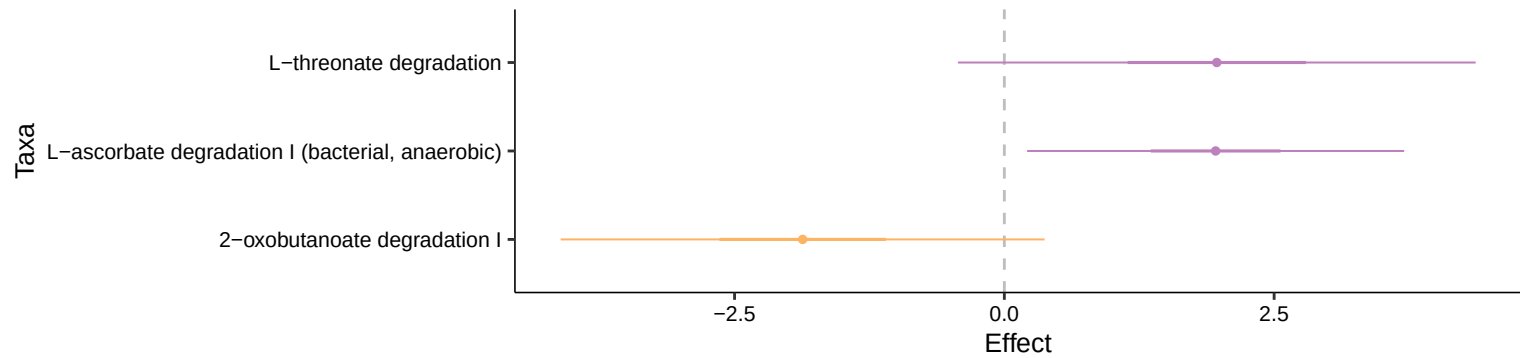

Amino Acid Biosynthesis

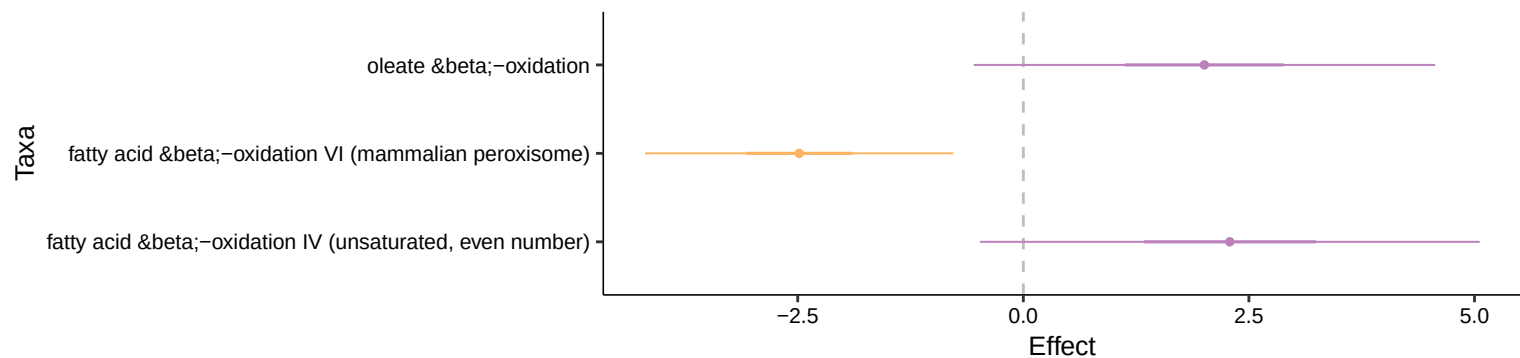

Amide, Amidine, Amine, and Polyamine Degradation&&Fermentation

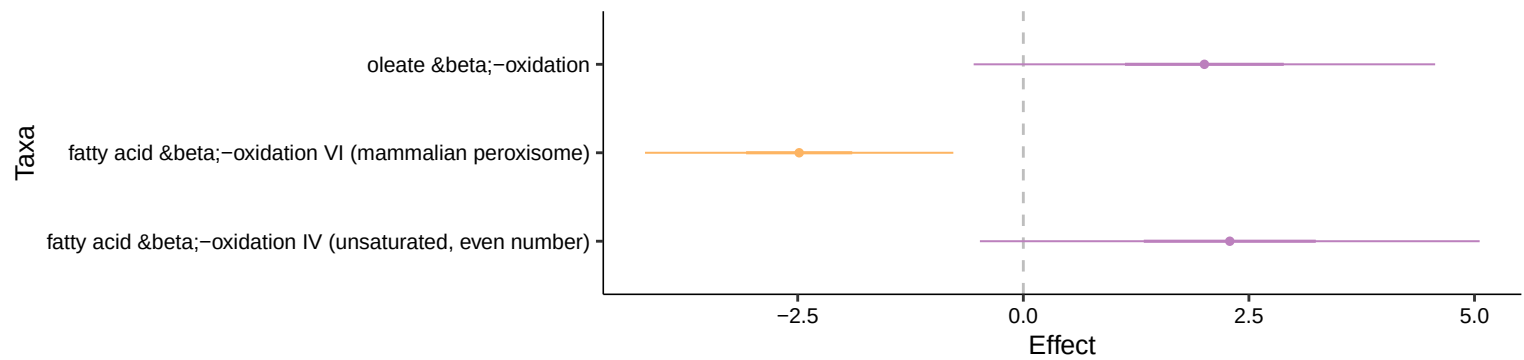

Carboxylic Acid Degradation

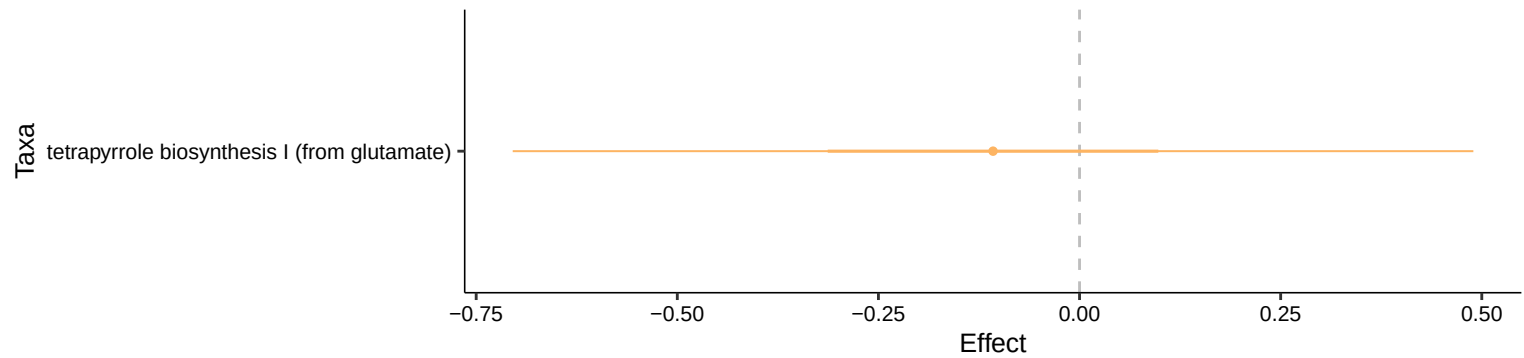

Fatty Acid and Lipid Degradation

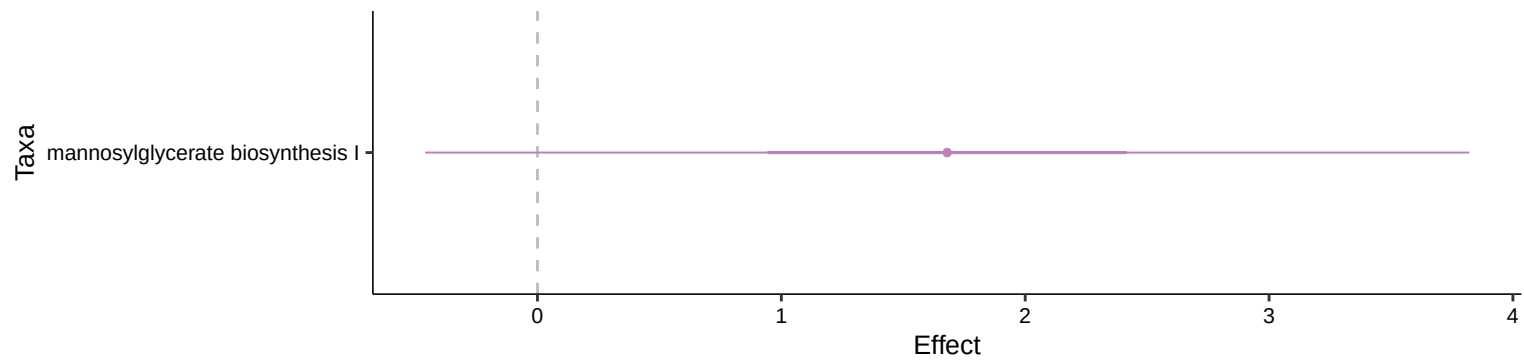

Fatty Acid and Lipid Degradation

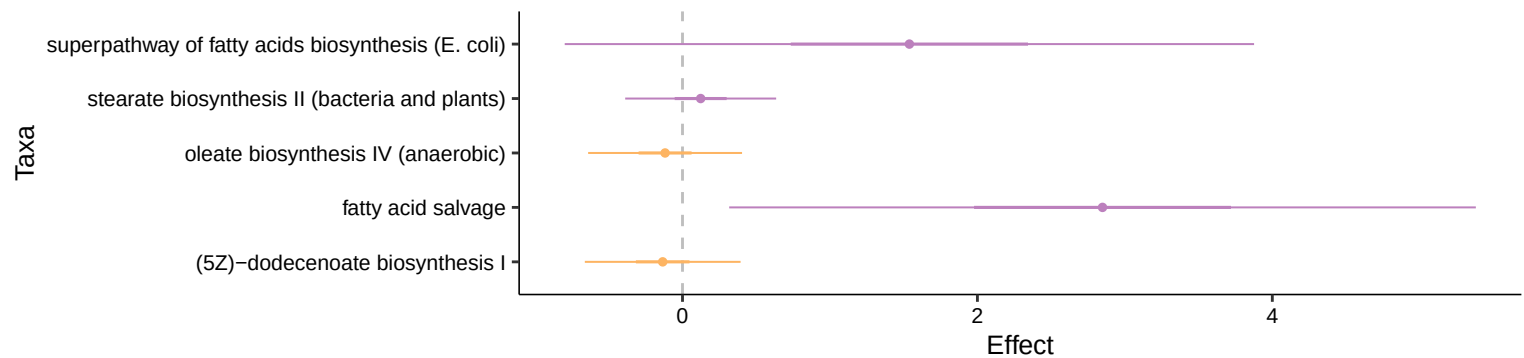

Tetrapyrrole Biosynthesis

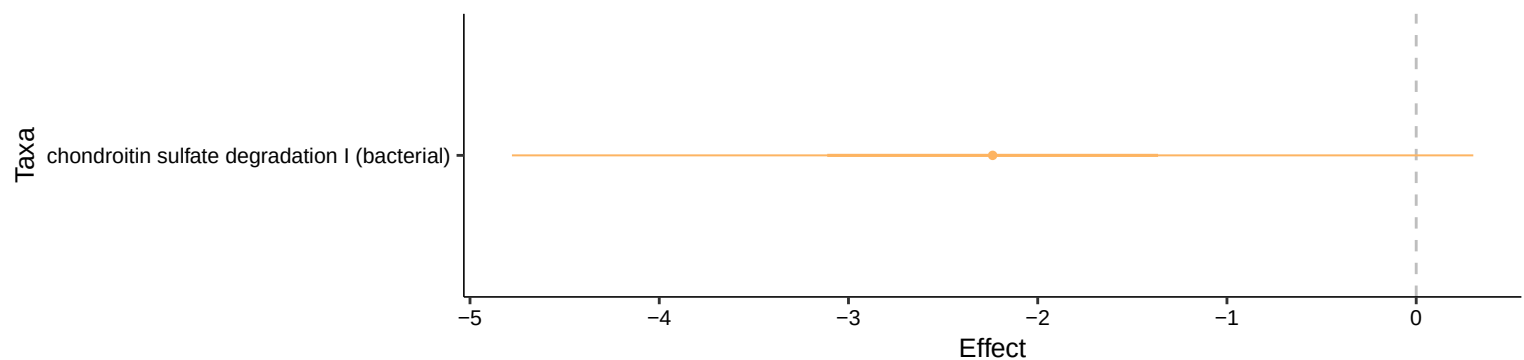

Metabolic Regulator Biosynthesis

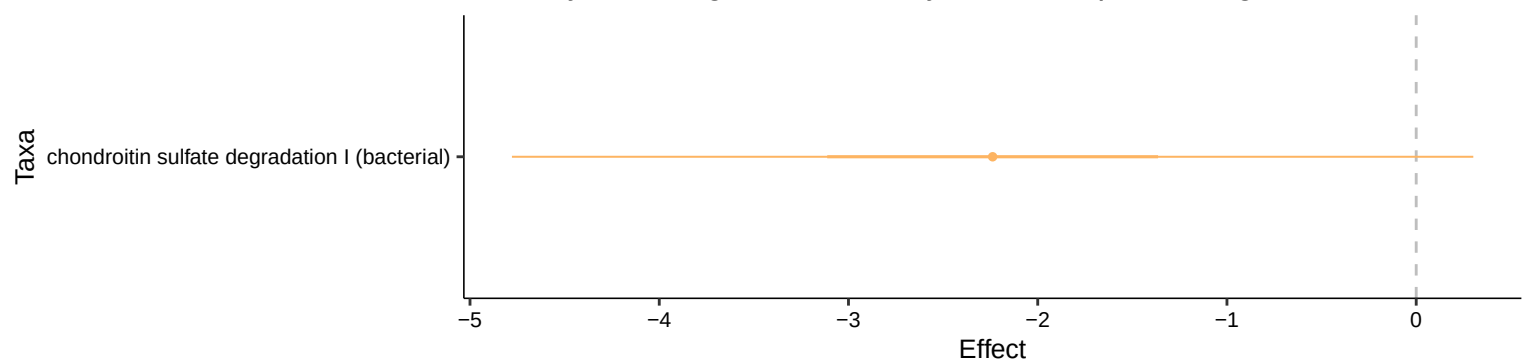

Fatty Acid and Lipid Biosynthesis

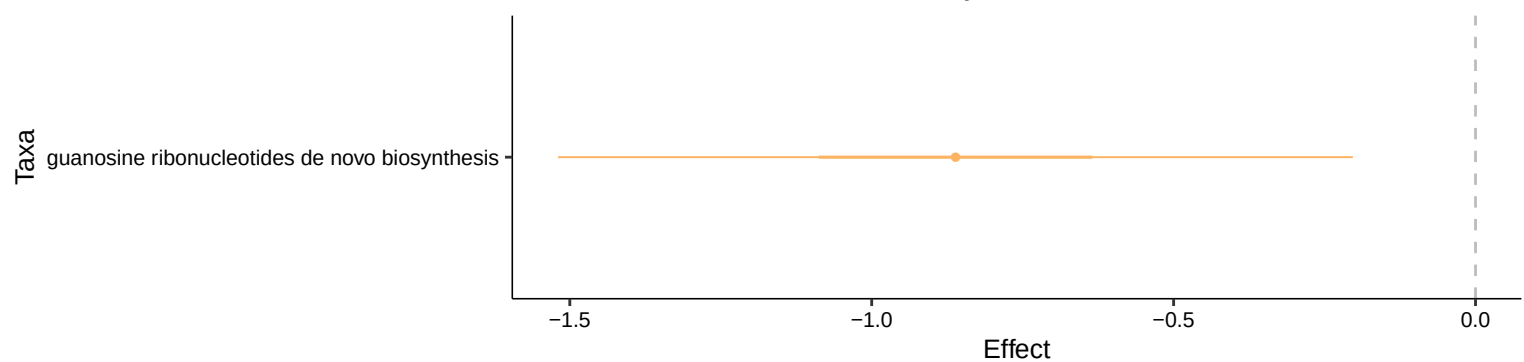

Carbohydrate Degradation&&Polymeric Compound Degradation

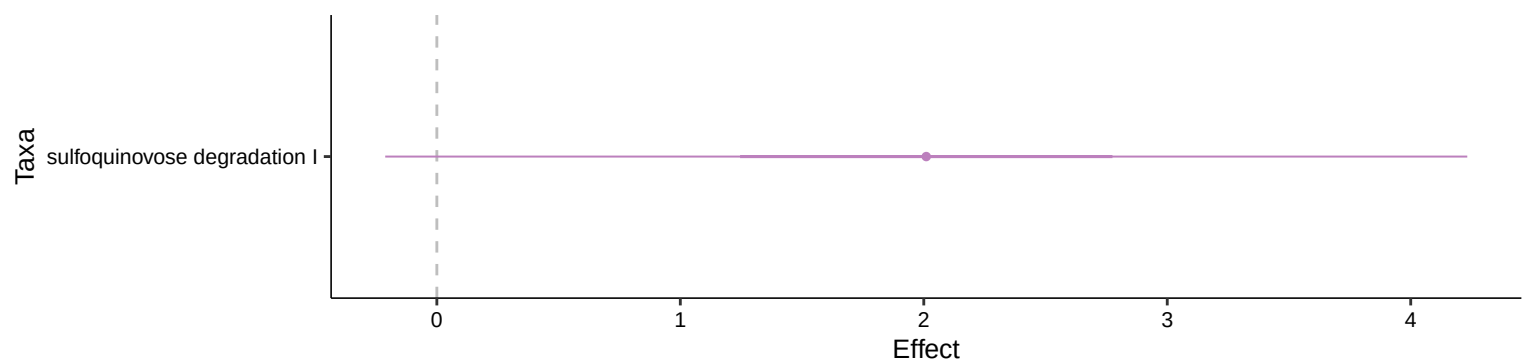

Carbohydrate Degradation&&Polymeric Compound Degradation

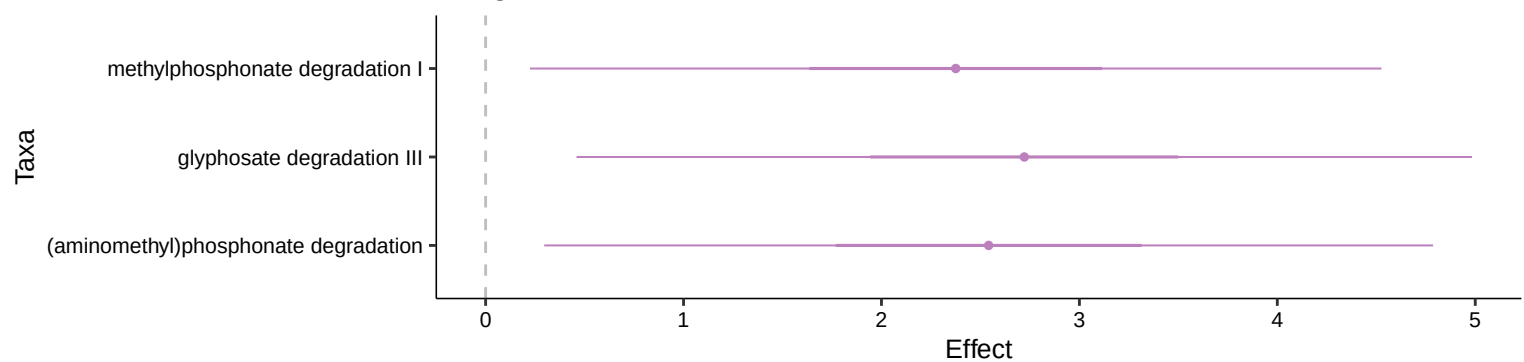

Nucleoside and Nucleotide Biosynthesis

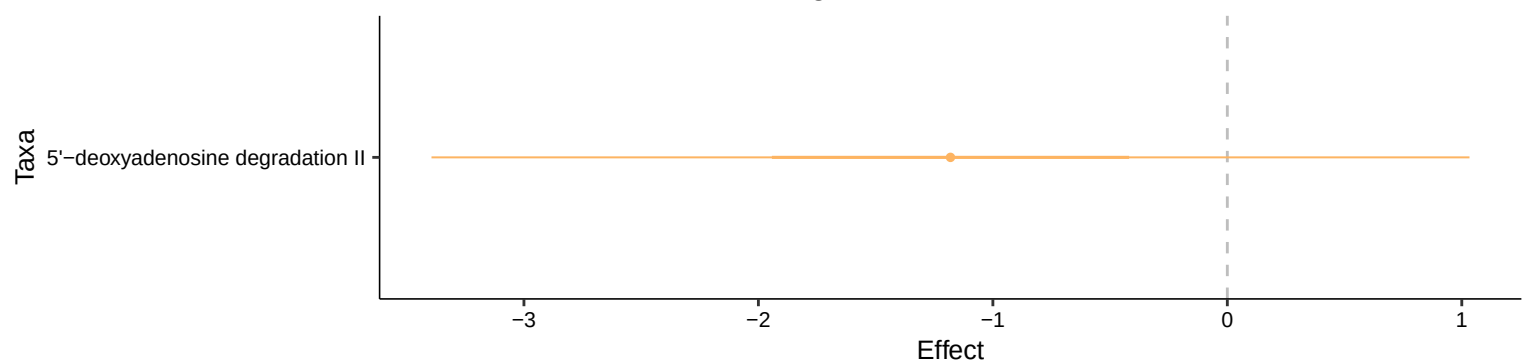

Secondary Metabolite Degradation

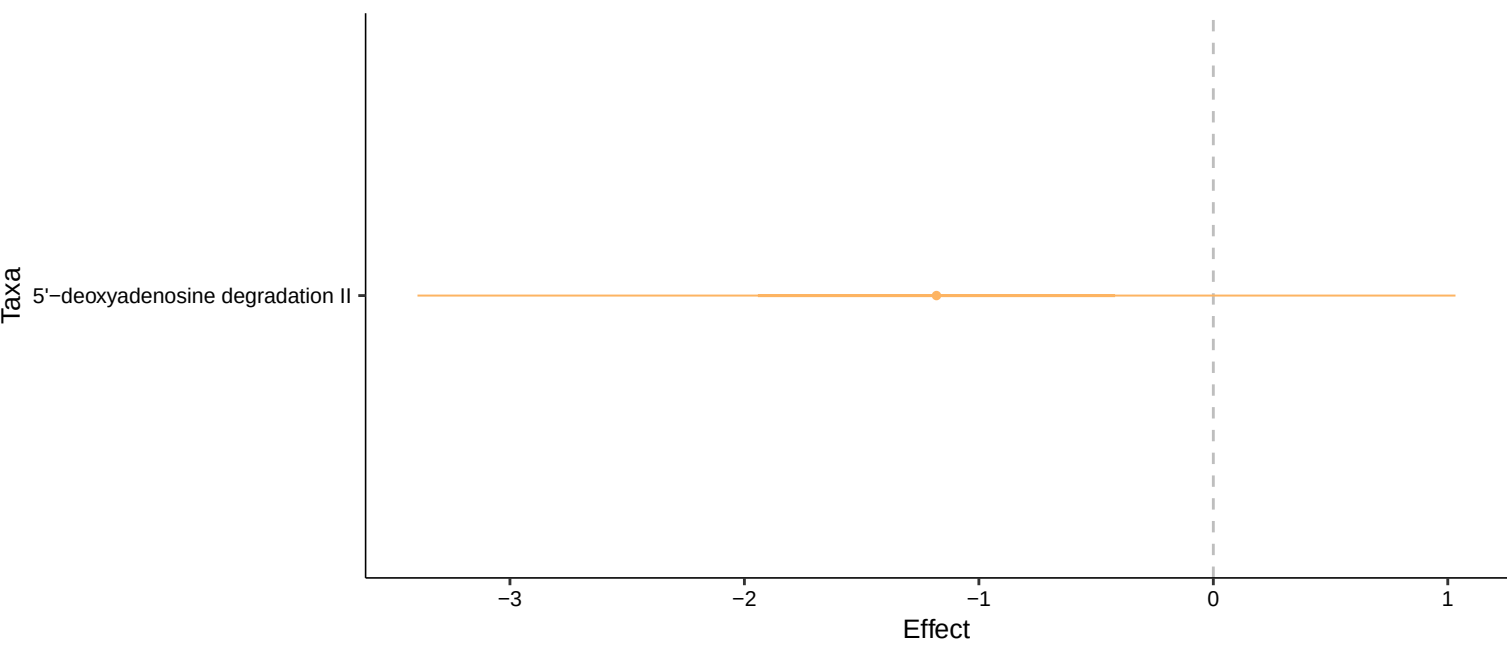

Inorganic Nutrient Metabolism

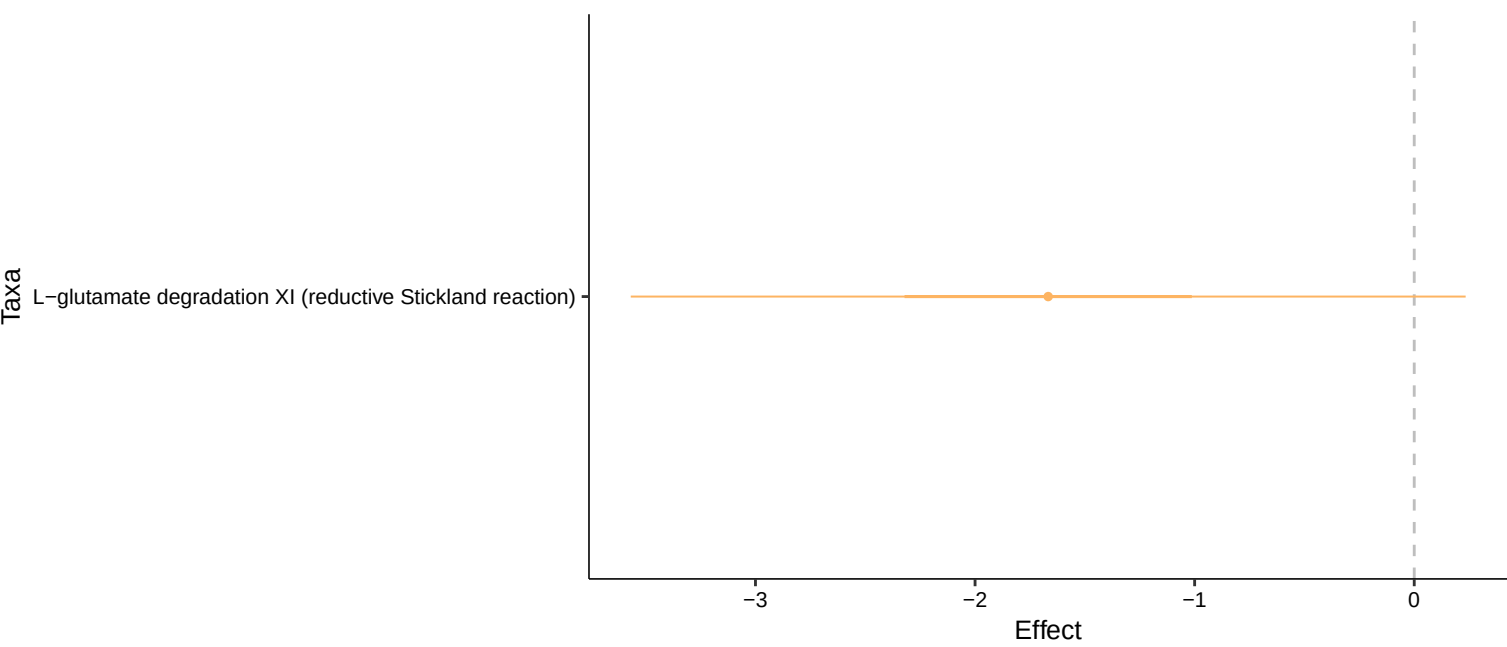

Nucleoside and Nucleotide Degradation

Nucleoside and Nucleotide Degradation

Fermentation&&Amino Acid Degradation

Cell Structure Biosynthesis&&Antibiotic Resistance
