

Degradation/Utilization/Assimilation

Taxa

Secondary Metabolite Degradation

Nucleoside and Nucleotide Degradation

Inorganic Nutrient Metabolism

Carboxylic Acid Degradation

Carbohydrate Degradation&&Polymeric Compound Degradation

Carbohydrate Degradation

Aromatic Compound Degradation

Amino Acid Degradation

Amide, Amidine, Amine, and Polyamine Degradation

Alcohol Degradation&&Carbohydrate Degradation

Alcohol Degradation

-20

0

20

Effect

Degradation/Utilization/Assimilation&&Detoxification

Taxa

Inorganic Nutrient Metabolism&&Respiration

Inorganic Nutrient Metabolism

Amino Acid Degradation&&Fermentation

Amide, Amidine, Amine, and Polyamine Degradation&&Fermentation

20

Effect

Biosynthesis

Taxa

Tetrapyrrole Biosynthesis&&Secondary Metabolite Biosynthesis

Secondary Metabolite Biosynthesis

Polyprenyl Biosynthesis&&Secondary Metabolite Biosynthesis

Fatty Acid and Lipid Biosynthesis&&Cell Structure Biosynthesis

Fatty Acid and Lipid Biosynthesis

Cofactor, Carrier, and Vitamin Biosynthesis&&Tetrapyrrole Biosynthesis

Cell Structure Biosynthesis

Carbohydrate Biosynthesis

Amino Acid Biosynthesis

Biosynthesis&&Glycan Pathways

Taxa

Carbohydrate Degradation&&Polymeric Compound Degradation

Generation of Precursor Metabolites and Energy

Biosynthesis&&Generation of Precursor Metabolites and Energy

Taxa

Secondary Metabolite Biosynthesis
